function .

setter →

f
of

public

void

ca

1. ...
 } this thing =

getter → gets
 a

public type ge
 return this . i
 }

no output

public void setName

Access
modifier

```
this.name = na  
}  
  
public String getN  
return this.na  
}
```

return
type

output

```
public  
re  
}
```
